When it was known that Temple Brooke was coming back to Westmore to live, everybody wondered which of her four houses she would occupy. She stayed away four years. She did not write many letters. People ceased to think about her. They ceased to expect her back. And then suddenly she appeared.

She had changed considerably. Her figure was fuller, she had a graver face, and her red hair had dulled until it no longer arrested the eye like flame. She still wore black, but it was modified black—black and white or black with gold or green touches—and she never had heen so pretty in her life.

It is the function of the kidneys to filter this acid from the blood and cast it out in the urine. The pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed, thus forcing the kidneys to do double work, they become weak and slug-gish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles, causing stiffness, sore-ness and pain called rheumatism.
